

High Park Orienteering Challenge

		1
2	3	4
5	6	7
8	9	10

There are 10 controls hidden around the park , each control is marked on this map along with that is also written on the control.

each **purple** control has a number and a letter. The number of its location. Once you find the control take a note of the letter

Top tips: Try to keep the map “orientated” (pointed north), remember that it’s not a “picture” it’s a representation of a “birds eye view” i.e. what would a bird in the sky see?. Look at the symbols on the map, the pictures and colours. Try to work out what they mean by walking around and comparing the symbols on the map to what’s happening around you. You can choose to use or not use the clues, try without first and see how you get on.

Can you collect all ten?. How quickly can you get round the course?.

Please do not post the answers on “Teams”, please allow others to find them for themselves.

Control location clues

- 1. Tree near path**
- 2. Tree near path**
- 3. Tree north side of rocks**
- 4. Tree north / east of campfire circle**
